Reference:- Your NAT. 800 of 21.3.45 to
President Local Council,
Nathanya.

Assistant District Commissioner,
Nathanya.

I have to thank you for your letter,
particularly para 3 thereof. I am fundamentally
opposed to any alienation of State Forests which
have been permanently allocated to this Department
for afforestation, particularly those on which
operations have commenced.

Sgd. G. N. Sale

Subject:- Nathanya State Forest.

Note.

On 27.7.43 I discussed (6) with M.O.N.D. I asked him to supply me with a plan on a suitable scale showing the various blocks of Nathanya forest. It appears that formation in Nathanya Block is practically complete, but recruiting is naturally necessary. In Qadima North (visible from the main road) (see para 4 of folio 5)), the Tamarisk cuttings have been put in along the banks of the Wadi. Some of them have succeeded, but they were put in too late and next year should be recruited earlier in the season. Fencing has not yet been completed, but it will be done as soon as the wire from Rosh Pinah has arrived.

2. I saw a plan of Qadima East, which is very sandy. Strips of various species, even including Eucalyptus, have been planted along compartment lines, but with poor results. M.O.N.D. hopes to have funds to continue work here next season.

3. In connection with the programme for 1943/44 season, I promised at my next visit to the North to bring the skeleton afforestation scheme from the Estimates file for discussion with M.O.N.D.

7

Note.

File No 5/N

On 24.2.43 I inspected plantations near Nathanya with Mr. Lahav A.C.F.N.D., Forest Ranger Ravitzky and Forest Guard Bowman.

2. We agreed that the term 'Nathanya State Forest' should cover the various blocks such as Nathanya Forest Reserve, Qadima North Forest Reserve, Qadima South Forest Reserve etc; that is, all the State Forests in the neighbourhood, but not those Forest Reserves temporarily allocated for guardianship pending the settlement of local social problems.

3. We walked through Nathanya Forest Reserve accompanied by Mr. Lifshitz, a very helpful neighbour on whose land the Department had a flying nursery without rent. The two-year Eucalyptus has grown extremely well and we were much interested in 1-year Eucalyptus, Oak sowings, planted Zizyphus, Dalbergia, Poplar, Pistacias, and a mixture of Aleppo & sempervirens, etc. I have asked for a copy of the stock map to be supplied for this file. I congratulated all three officers on the good work in which they had a share.

4. On the same afternoon we inspected Qadima North Block which is practically all planted with pure E. camaldulensis, mostly 1941-42, with some new recruits. Results were on the whole good, though the soil seems to vary considerably.

(a) on the west and north-west, the plantation promises to equal the results obtained in Nathanya Block.

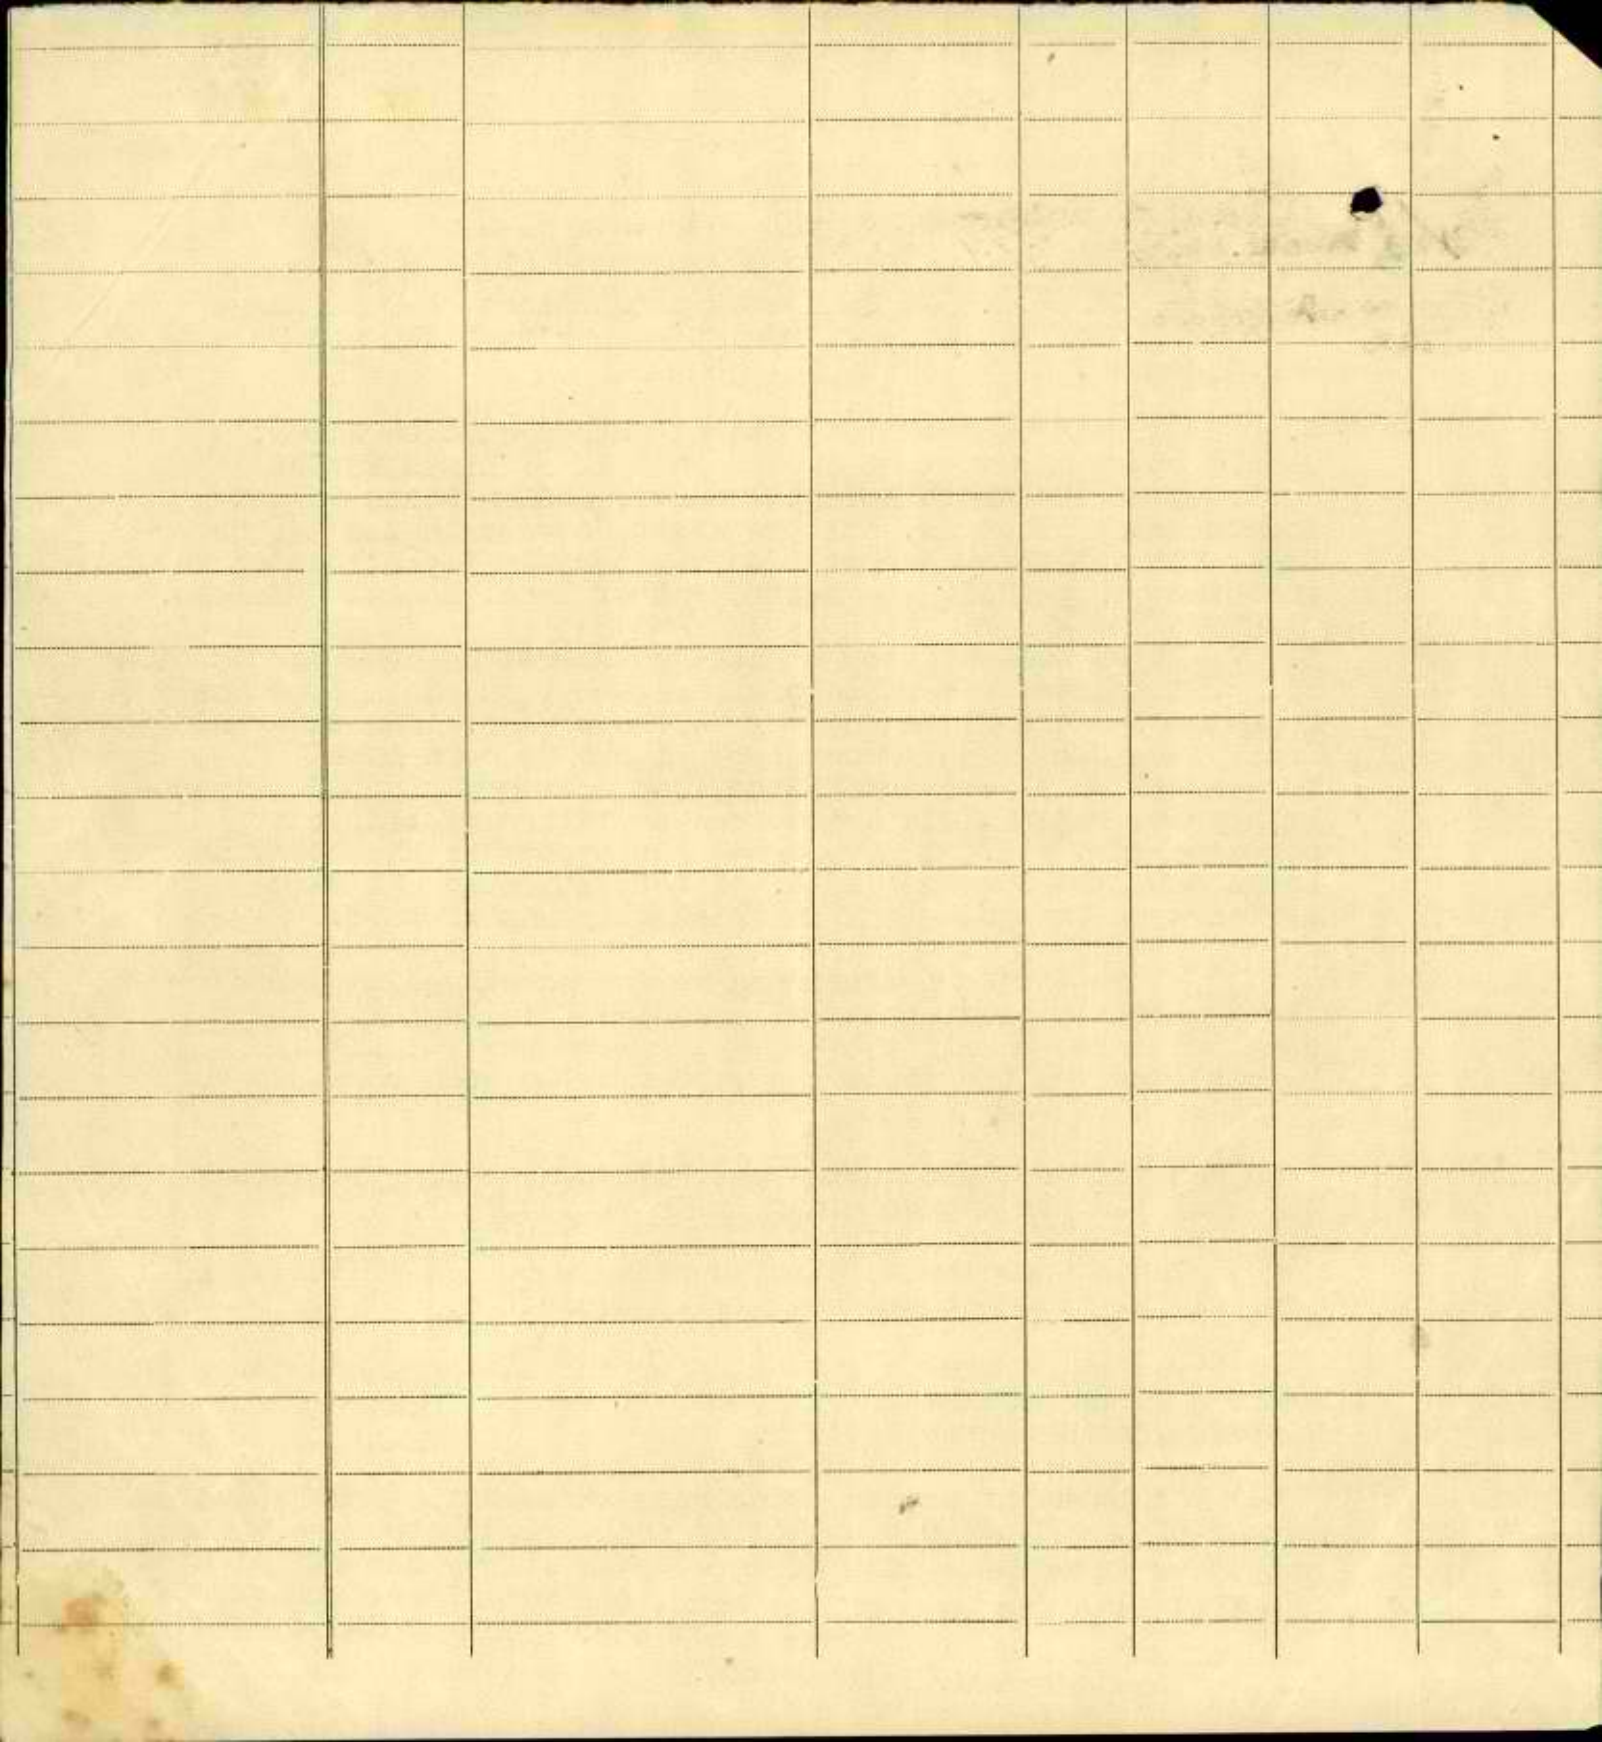

(b) plants near the eastern boundary were put in late, and many blanks have not yet been fully recruited.

(c) grazing damage is evident near the southern boundary, where a fence must be constructed, if we obtain wire from District Commissioner Galilee.

(d) the banks of a wadi which runs through the north-eastern corner of the block are crumbling and threaten to move. They should be fixed by a line of Eucalyptus fairly closely planted parallel with the edge of the bank, and with large numbers of Tamarix cuttings put in down the slope. This could be done, or at least started, this season.

over.

13th April, 1941.

CONSERVATOR OF FORESTS.

(1) I am enclosing copy of a letter from the Medical Officer Nathanya. Together with the Medical Officer we inspected the Forest Reserve. In view of the presence of malaria mosquitoes in the swamp, I instructed the cutting of the vegetation to make petrolization of the swamp possible. The solar oil required in this instance has been kindly advanced by the Public Health Department. However, the petrolization can be effective for a short period only. A permanent solution in the form of a drainage channel is required.

2. The line for the ditch as proposed by the P.H.D. is probably the shortest but there is a likelihood that if it is run as recommended, it might ~~cost~~ the formation of a gully outside our land. We shall therefore study an alternative location free of that objection.

3. Meanwhile your authority is required to spend the sum of LP.40.- from the 'Afforestation' Vote as a charge of maintaining the plantation. A detailed working scheme will be submitted as soon as completed.

292

Subject: Nathanya Forest Reserve No. 290

There is a swamp on the above mentioned area of your department.

In former years the swamp has been frequented by herds of Cattle which changed the conditions of the swamp so as to make Anopheles breeding very difficult or impossible. This year the fencing in of this area and planting of trees prevents the cattle to enter the swamp and now the problem of draining it becomes urgent. For this a canal of about 400 meters will be necessary to drain the water off to the near natural wash. Some filling would also be necessary. It is estimated that the work will cost approximately L.P. 40.

I should appreciate if you could arrange to have this work carried out or transfer to this Dept. the required sum with which to carry out the work.
